Marine protected areas (MPAs) and freshwater protected areas (FPAs), collectively aquatic protected areas (APAs), share many commonalities in their design, establishment, and management ...

### **Salty stories, fresh spaces: Lessons for aquatic protected**

in what are called Fishery Closure Areas. Continuous video monitoring satellite surveillance ensures that the closures are protected from trawling. There is 15,830 sq km of juvenile prawn habitat that mostly could be fished but is now protected within permanent closure areas, and a further 51,470 sq km protected within seasonal closure areas.

### **Aquatic Protected Areas - Murdoch University**

Five protected areas representing three IUCN categories protected 8.7% of the Great Lakes proper (Figure 1; Table 3). Similar to the coast, the in-lake waters of the upper Great Lakes (Lake Superior, Lake Michigan, and Lake Huron) contained greater coverage of protected areas than the lower Great Lakes (Lake Erie and Lake Ontario),

### **Status and Extent of Aquatic Protected Areas in the Great**

Marine protected areas can be defined as "Any area of intertidal or subtidal terrain, together with its overlying water and associated flora, fauna, historical and cultural features, which has been reserved by law or other effective means to protect part or all of

### **Role of marine and freshwater aquatic protected areas**

terrestrial environments. Thus, little is known about how well protected areas perform in representing aquatic biodiversity. This study analyses the suitability of national and European protected area networks (Natural Protected Areas and Natura 2000) in representing such biodiversity.

### **The role of protected areas in representing aquatic**

NSW aquatic reserves are an important part of the NSW system of marine protected areas (PDF, 996.94 KB). Many of the 12 aquatic reserves in NSW have been in place for over 30 years. The first was established in 1980 at Long Reef on Sydney's northern beaches.

### **Aquatic reserves - NSW Department of Primary Industries**

freshwater protected areas. Findings for steelhead and coho salmon in the study basins suggest how the approach and developed models might be applied to other aquatic species for which links to topographic features are known or scaled-up to aid in regional prioritization of reaches or watersheds as protected areas.
