In the Soviet Union, science and technology served as an important part of national politics, practices, and identity. From the time of Lenin until the dissolution of the USSR in the early 1990s, both science and technology were intimately linked to the ideology and practical functioning of the Soviet state, and were pursued along paths both similar and distinct from models in other countries.

SCIENCE: Science is systematized knowledge derived from observation, study, and experimentation. Thus, it deals only with phenomena that can be examined empirically. Contrary to popular opinion, it is not a grab-bag of immutable facts, but rather a way of asking questions and evaluating various possible answers.
