Mini-Conference Themes. Each mini-conference will consist of 3 to 6 panels, which will be featured as a separate stream in the program. Each panel will have a discussant, meaning that selected participants must submit a completed paper in advance, by 1 May 2018. Submissions for panels will be open to all scholars on the basis of an extended abstract.

Renewable energy is energy that is collected from renewable resources, which are naturally replenished on a human timescale, such as sunlight, wind, rain, tides, waves, and geothermal heat. Renewable energy often provides energy in four important areas: electricity generation, air and water heating/cooling, transportation, and rural (off-grid) energy services.

World energy consumption is the total energy used by the entire human civilization. Typically measured per year, it involves all energy harnessed from every energy source applied towards humanity's endeavours across every single industrial and technological sector, across every country. It does not include energy from food, and the extent to which direct biomass burning has been accounted for ...

1.. Introduction Over the past 50 years, literally hundreds of building energy programs have been developed, enhanced and are in use. The core tools in the building energy field are the whole-building energy simulation programs, which provide users with key building performance indicators such as energy use and demand, temperature, humidity, and costs.

Kelly McParland. July 19, 2017. 10:05 AM EDT. When former premier Dalton McGuinty visited the new Siemens Canada plant in Tillsonburg in 2011, he brushed aside protesters and boasted that the plant was part of the Liberal alternative energy plan that would "put us at the forefront in North America". The plant made windmill blades.

This post reviews the weird and wonderful world of high altitude wind power. It looks into the reasons for wanting to go high, explains tethered flight and explores the main competing technologies of 1) airborne

generation (Google Makani) and 2) ground based generation (KiteGen) and compares their strengths and weaknesses.

Congressional Research Service Reports . The Congressional Research Service is the public policy research arm of the United States Congress and solely serves Congress as a source of nonpartisan, objective analysis and research on all legislative issues. Through Congress, the National Agricultural Law Center periodically receives CRS reports related to agriculture and food issues.
