Big data Changing the way businesses compete and operate Insights on governance, risk and compliance April 2014

### **Big data: changing the way businesses compete and operate**

Big data will become a key basis of competition, underpinning new waves of productivity growth, innovation, and consumer surplus--as long as the right policies and enablers are in place.

### **Big data: The next frontier for innovation, competition**

Big data is a term used to refer to data sets that are too large or complex for traditional data-processing application software to adequately deal with. Data with many cases (rows) offer greater statistical power, while data with higher complexity (more attributes or columns) may lead to a higher false discovery rate. Big data challenges include capturing data, data storage, data analysis ...
