During the Golden Age of Islam, especially during the 9th and 10th centuries, mathematics saw many important innovations building on Greek mathematics. The most notable achievement of Islamic mathematics was the development of algebra. Other notable achievements of the Islamic period are advances in spherical trigonometry and the addition of the decimal point to the Arabic numeral system.

School of Distance Education Quantitative Techniques for Business 5 CHAPTER " 1 QUANTITATIVE TECHNIQUES Meaning and Definition: Quantitative techniques may be defined as those techniques which provide the decision

QUANTITATIVE TECHNIQUES FOR BUSINESS

The chapter assesses whether two kinds of theories of fundamental rights, namely the natural law tradition underlying the international protection of human rights and the liberal political tradition that awards rights priority in theories of justice, provide an adequate grounding for a system of labour law.

Theories of Rights as Justifications for Labour Law

Charles S. Peirce randomly assigned volunteers to a blinded, repeated-measures design to evaluate their ability to discriminate weights. Peirce's experiment inspired other researchers in psychology and education, which developed a research tradition of randomized experiments in laboratories and specialized textbooks in the 1800s.
