ClassZone Book Finder. Follow these simple steps to find online resources for your book.

**ClassZone**

Very helpful addition to the book - I do wish it was printed larger though in full size pages as opposed to 2 pages to 1. Just means I have to copy each page as a PDF and then blow it up to 200% - Still worth it as it follows the classwork and gives examples for the kids to do.

The shoelace formula or shoelace algorithm (also known as Gauss's area formula and the surveyor's formula) is a mathematical algorithm to determine the area of a simple polygon whose vertices are described by their Cartesian coordinates in the plane. The user cross-multiplies corresponding coordinates to find the area encompassing the polygon, and subtracts it from the surrounding polygon to ...

## Polar Coordinate System

In mathematics, the polar coordinate system is a two-dimensional coordinate system in which each point on a plane is determined by a distance from a reference point and an angle from a reference direction.. The reference point (analogous to the origin of a Cartesian coordinate system) is called the pole, and the ray from the pole in the reference direction is the polar axis.
