PL/SQL program unit. The main feature of SQL (non procedural) is also a drawback of SQL: one cannot use control statements (decision-making or iterative control) if only SQL is to be used. PL/SQL is basically a procedural language, which provides functionality of decision making, iteration and many more features like other procedural programming languages.

History. SQL was initially developed at IBM by Donald D. Chamberlin and Raymond F. Boyce after learning about the relational model from Ted Codd in the early 1970s. This version, initially called SEQUEL (Structured English Query Language), was designed to manipulate and retrieve data stored in IBM's original quasi-relational database management system, System R, which a group at IBM San Jose ...
