A Teaching Guide for Structural Steel Connections

Pipe is made out of many types of material including ceramic, glass, fiberglass, many metals, concrete and plastic. In the past, wood and lead (Latin plumbum, from which comes the word 'plumbing') were commonly used. Typically metallic piping is made of steel or iron, such as unfinished, black (lacquer) steel, carbon steel, stainless steel, galvanized steel, brass, and ductile iron.

Standard Specification for Cold-Formed Welded and Seamless

Safety Alert: EMF Radiation Hazard in Welding > Welds that Pass Inspection < While the goal is to join two pieces of metal, welding often involves a code specifying how the work should be performed. The basic idea is to run one or more weld "beads" along the joint so the sides fuse together without any gaps in between.
