CALCULUS.ORG Editorial Board. Sponsors. Calculus.org Resources For The Calculus Student: Calculus problems with step-by-step solutions Calculus problems with detailed, solutions.

CALCULUS.ORG

Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

Calculus - Wikipedia

The guide to vector analysis that helps students study faster, learn better, and get top grades. More than 40 million students have trusted Schaum's to help them study faster, learn better, and get top grades.

Vector Analysis, 2nd Edition: Murray Spiegel, Seymour

Mathematics is one of the oldest disciplines of study. For all its antiquity, however, it is a modern, rapidly growing field. Only 70 years ago, mathematics might have been said to consist of algebra, analysis, number theory and geometry.

Mathematics & Statistics | Smith College

Welcome to my math notes site. Contained in this site are the notes (free and downloadable) that I use to teach Algebra, Calculus (I, II and III) as well as Differential Equations at Lamar University. The notes contain the usual topics that are taught in those courses as well as a few extra topics that I decided to include just because I wanted to.

Pauls Online Math Notes

AP Calculus BC is roughly equivalent to both first and second semester college calculus courses and extends the content learned in AB to different types of equations and introduces the topic of sequences and series.

Vector Analysis: K. A. Stroud, Dexter Booth: 9780831132088

The cross product of two vectors a and b is defined only in three-dimensional space and is denoted by $\vec{a} \times \vec{b}$. In physics, sometimes the notation $\vec{a} \wedge \vec{b}$ is used, though this is avoided in mathematics to avoid confusion with the exterior product.. The cross product $\vec{a} \times \vec{b}$ is defined as a vector c that is perpendicular (orthogonal) to both a and b , with a direction given by the right-hand rule ...

Cross product - Wikipedia

I have a love/hate relationship with calculus: it demonstrates the beauty of math and the agony of math education. Calculus relates topics in an elegant, brain-bending manner. My closest analogy is Darwin's Theory of Evolution: once understood, you start seeing Nature in terms of survival. You ...
